PROFESSIONAL SUMMARY

Senior Software & AI Engineer with 5+ years building and scaling SaaS platforms end-to-end. Led a 15-engineer team through platform modernizations that cut infrastructure costs by 40–60% and reduced page loads from 15s to under 2s. Architected production LLM/RAG pipelines, high-concurrency systems handling 1M+ monthly users, and multi-gateway payment infrastructure. Async-first, distributed team experience.

TECHNICAL SKILLS

Languages: Ruby, Python, TypeScript, JavaScript, SQL, HTML/CSS

Frameworks: Ruby on Rails, React, Next.js, Node.js, FastAPI, Express, LangChain

Databases: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch, Pinecone (Vector DB)

Cloud & DevOps: AWS (EC2, RDS, S3, Lambda, ECS/Fargate, CloudFront, VPC), Docker, Nginx, CI/CD, Cloudflare Workers

AI/ML: Retrieval-Augmented Generation (RAG), LLM Fine-tuning, Prompt Chaining, OpenAI API, AI Agents

Tools: Stripe Connect, Apple Pay, PayPal, Sidekiq, FFmpeg, Sentry, Cloudinary, Tesseract OCR

PROFESSIONAL EXPERIENCE

Team Lead & Senior Software Engineer

Apr 2023 – Present

3Solutions — Hybrid

- Lead 15+ engineers across multiple SaaS modernizations, establishing code review standards and sprint processes that increased release velocity by 35%.
- Architected an incremental Strangler Fig migration of a legacy EdTech monolith to React and Rails, cutting infrastructure costs by 60% and page loads from 15s to under 2s.
- Designed a high-concurrency Ticket Inventory System for a platform serving 1M+ monthly users, eliminating race conditions and ensuring 100% accurate allocations during flash sales.
- Led query optimization across PostgreSQL and Elasticsearch, reducing database response time by 40%+ and enabling full-text search over millions of records.
- Architected production LLM/RAG pipelines using LangChain, Pinecone, and OpenAI API, powering AI features for thousands of users with sub-second latency.

Software Engineer

Jul 2021 – Apr 2023

Southville Solutions — Lahore, Pakistan

- Developed secure checkout and batch settlement logic for a payments platform processing ACH, Push-to-Card, and E-Check transactions via Stripe Connect with strict idempotency.
- Built real-time multi-state compliance workflows for an enterprise workforce management tool serving staffing agencies across multiple US states.
- Configured Docker environments with AWS EBS and CloudFront versioning, reducing deployment downtime to near zero. Mentored 4 junior engineers.

Associate Software Engineer

Jan 2021 – Jul 2021

TeachCreatix — Lahore, Pakistan

- Shipped full-stack EdTech features using React and Ruby on Rails, integrating RESTful APIs and webhooks. Configured Nginx on AWS for production deployments.

KEY PROJECTS & PRODUCTS

- Upcoming Events** (upcomingevents.com) — Event ticketing platform handling 1M+ monthly users with concurrent ticket sales, multi-gateway payments (Stripe, Apple Pay, PayPal), Redis caching, and edge delivery via CloudFront. Rails, ECS/Fargate, PostgreSQL.
- Piqosity** (piqosity.com) — Adaptive test-prep platform (ISEE, SAT, ACT) with dynamic assessments and analytics-driven learning paths. Led full Strangler Fig migration, cutting costs 60%. React, Rails, Elasticsearch, Redis.
- Evyai** (evyai.com) — AI social content assistant (web app + Chrome extension) with production RAG, LLM fine-tuning, and cross-environment SSO. Thousands of active users. FastAPI, LangChain, Pinecone.
- QuickCard** (quickcard.me) — Cashless checkout infrastructure with blockchain-secure transactions, batch settlement, and multi-flow payments (ACH, Push-to-Card, E-Check). Rails, Stripe Connect, Elasticsearch.
- ClawHost** (clawhost.pro) — One-click AI agent deployment platform on dedicated cloud VMs with sandboxed environments, 850+ integrations, and hot-swappable LLM providers. Next.js, Docker, Stripe.

EDUCATION

Bachelor's in Software Engineering — COMSATS University, Lahore

2016 – 2020
